Whomever it may concern

Dear Sir/Madam,

This is to confirm that Trajkovski & Partners are our local implementing partner in a two-year bilateral assistance project titled: "Building Capacity for professional qualifications".

The project is aimed at strengthening the capacity of the Macedonian Ministry of Education and Science in improving the qualification recognition process in line with European Standards, in order to create increased opportunities for free movement of workers and services.

The implementation is conducted together with UK's National Recognition Information Centre NARIC and is envisaged to last until March 2013. Specific outputs include improved legal framework, stakeholders' analysis, establishment of cross-sectoral working group and its capacity building, development of methodology for maintaining recognition records etc.

Yours sincerely,

Christine Winterburn

Deputy Head of Mission
British Embassy Skopje
